HSC in Tamil Nadu State Board Education - 95.33%

Holy Immanuel Matriculation School — Avadi
SSLC in Tamil Nadu State Board Education - 90%

PROFILE

Dedicated Computer Science student with experience in full-stack and backend development. Built academic projects using Python, MERN stack, and MySQL with focus on responsiveness and clean UI. Curious how software enables real-time systems, simulations, and data handling.

INTERNSHIPS

CaratLane – A Tanishq Partnership, Thousand Lights, Chennai
Duration - (Jul 2025 – Present)
Project Title and Role - Post Sales (Quality Engineer)
Working on based **post-sales** project; responsible for test case design, bug tracking, and QA validation.

Alpixn Technologies - Full Stack Developer Intern (Remote)
Duration -June 2025
Project Title - AI App Builder
Contributed to end-to-end feature development and debugging across frontend (React) and backend (Node.js) stacks.

PROJECTS

Travel Diary Calendar GitHub Link

Built a Travel Diary Calendar using ML and Flask to suggest ideal travel locations based on user preferences. Integrated an interactive map and calendar to display location-based alerts and trip planning. Designed a clean, responsive UI for a smooth and engaging user experience.

Event Management Application (**HTML, PHP, MySQL**) GitHub Link

Developed a event management system for technical and non-technical events. It enables organizers to track progress easily, assigns tasks and updates for volunteers, and provides staff advisors with a centralized dashboard for event oversight.

LinkedIn Clone (**MERN Stack**) GitHub Link

Implemented a LinkedIn clone which includes user authentication, profile management, creating posts, liking, commenting, and sending connection requests. Created a responsive and interactive feed for enabling client-side user interactions and networking. Optimized for seamless performance and user-friendliness.

E-Commerce Website (**MERN Stack**) GitHub Link

Developed a scalable, responsive e-commerce site with complex product filtering, cart handling, and secure checkout. Added personalized recommendations, order tracking, and user review functionality, all within an intuitive interface for improved engagement.
